## SUMMARY

---

Backend engineer with **2.5+ years** building production Node.js/NestJS systems in **fintech** and **automotive** domains. Experienced in microservice architecture, event-driven pipelines, and multi-database environments under real load.

## EXPERIENCE

---

**42flows.tech** | Full-stack Developer

04.2025 – Present | 1 year

- Led migration from monolithic to **microservices architecture** for a banking Cashback module, improving scalability and maintainability.
- Integrated **Kafka**, **RabbitMQ**, and **Bull** message brokers for reliable inter-service communication, processing **300+** transactions per second.
- Implemented authentication and authorization using **Keycloak** and **LDAP**, supporting multi-tenant banking clients.
- Wrote complex **SQL transactions** and optimized queries across **PostgreSQL**, **Oracle**, and **MySQL** databases in production.
- Managed deployments via **Dokploy** on **AWS**, configured CI/CD pipelines, and monitored logs through **Kibana**.

**CGS Team** | Full-stack Developer

10.2023 – 02.2025 | 1 year 5 months

- Implemented advanced **Elasticsearch** search functionality with relevance tuning and filtering, improving result accuracy by **~20%**.
- Built a full-featured **Stripe** subscription system with webhook-driven billing and notifications.
- Extended a tree-based project management system with nested folders, node copying, and cascading RBAC for an interior design platform.
- Implemented user authentication and access control using **AWS Cognito**.
- Optimized **Redis** caching strategy, reducing database load by **~40%** and improving response times.

## EDUCATION

---

**Taras Shevchenko National University of Kyiv**

Bachelor's Degree (incomplete) — Computer Science

Sep 2021 – Dec 2023

Completed 120 ECTS. Studies interrupted by the full-scale Russian invasion of Ukraine.

**Coursework:** OOP, Database Design, Discrete Math, Computer Networks, Theory of Computation, Math Analysis, Linear Algebra, Differential Equations.

## SKILLS

---

|                  |                                                         |                       |                                  |
|------------------|---------------------------------------------------------|-----------------------|----------------------------------|
| <b>Languages</b> | TypeScript, JavaScript, Node.js                         | <b>Backend</b>        | NestJS, ExpressJS, Swagger       |
| <b>API</b>       | REST, GraphQL, tRPC                                     | <b>Auth</b>           | Keycloak, LDAP, AWS Cognito      |
| <b>Messaging</b> | Kafka, RabbitMQ, Bull                                   | <b>Frontend</b>       | React, Next.js                   |
| <b>Databases</b> | TypeORM, Prisma, DrizzleORM                             | <b>Infrastructure</b> | Docker, CI/CD, Kibana, Git, Jira |
